

# MSc Business Information

## Analytics Systems

CKL51

Business Analytics enables organisations to exploit the data and IS systems at their disposal to maximise organisational performance.

The MSc Business Information and Analytics Systems (MSc BIAS) will enable students to develop the skills necessary to gain business insights to improve business decision-making.

Business Analyst and Project Manager are listed as two of the top ten jobs in the IS / IT sector.

The (MSc BIAS) is designed to provide students with the skillset to be successful in these roles.

Organisations today need people who know how to gain knowledge from data so that business decisions are based on data and insights rooted in the business context.

*"The MSc BIAS gave me the opportunity to develop myself both technically and professionally. By the end of this course, you will look at data in a different light."*

– Jane Downey MSc BIAS 2017

## PROGRAMME DESCRIPTION

The MSc Business Information and Analytics Systems (MSc BIAS) provides students with a portfolio of business and analytical methods for solving problems and supporting decision making.

The MSc BIAS provides students with a specialism in Business Analytics as well as an extensive knowledge of business and IS concepts.

At the core of this programme is a selection of topics covering cloud technologies, Business Intelligence and Business Analytics, IT performance management, data management and IT project management.

A research project will allow student groups to explore and develop an IT solution to a business problem specific to the Business Information and Analytics Systems area.

This programme provides students with the technical skills and techniques needed by organisations to explore organisational issues and to support decision-making within a business context.

## UNIQUE ASPECTS

This is a 12 month course where students build on their current technical qualifications.

Students develop a skill set appropriate for roles such as business analyst, data analyst, consultant, project management and IT manager.

This programme is strongly associated with business where data and information plays a critical part.

Active input on programme content and specialisms is continuously incorporated from multinational industry leaders.

The MSc BIAS considers the technical enabling capability of IS and the behavioural aspects of management that support informed decision making.

The programme places an emphasis on design thinking and a cognitive approach to decision making.

## CAREER INFORMATION

*What can I do after I graduate with a MSc Business Information Analytics Systems?*

Consultancy firms, financial services firms, manufacturing and services organisations all require graduates who are data savvy and who can analyse data and draw conclusions.

The MSc BIAS will focus on the development of these skill sets.

Typical roles include Business Analyst, Business Analytics specialist, Data specialist, Consultant, Project Manager, Operations Research and IT Manager.

## LEARNING OUTCOMES

On successful completion of this programme, students should be able to:

- Communicate and work effectively to a high professional standard
- Demonstrate advanced analytical and problem solving skills associated with effective practice
- Engage in advanced application of frameworks and techniques in organizational settings
- Conduct research for business / policy sponsors and academic audiences
- Self-direct career development
- Understand the organisational context of data and information for business analytics

## PRACTICALITIES & ASSESSMENT

### Practicalities

16 lectures hours per week with up to 4 hours of lab work per week.

Between 3 and 5 field trips will be organised throughout the year.

Group project work continues to early July, concluding the formal course content.

However, students may be required to complete an individual essay in their own time up until the end of July / early August.

### Assessment

A hybrid approach to assessment is used in this programme.

Assessments methods include formal written exams, essays, group and individual project work and some lab practicals.

Some modules are 100% continuous assessment and most modules have a minimum of 40% continuous assessment.

During the programme, students will work individually and in groups.

A strong emphasis is placed on oral presentation of work.

Programme Code: **CKL51**  
Duration: **1 year (Full-Time)**  
Teaching Mode: **Classroom**  
Qualification: **MSc**  
NFQ Level: **Level 9**

## ENTRY REQUIREMENTS 2020
