

Join Cork's Climathon – a 24-hour climate change challenge taking place simultaneously in 121 cities around the world on 28 October 2016.

What is it?

Climathon is a global 24 hour hackathon focused on finding practical solutions to specific local climate change challenges. Climathon brings together the challenges of the world's cities with people who have the passion to solve them!

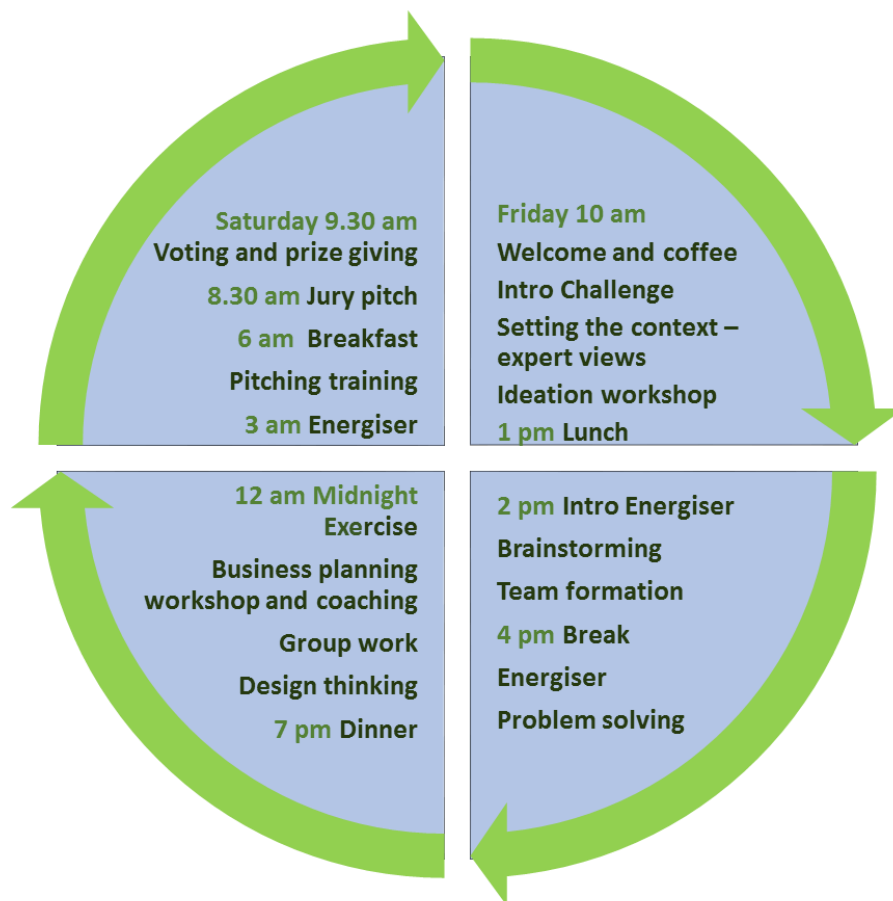

Why take part?

- Develop your skills in business planning, innovative thinking and pitching!
- Network with local leaders from business, academia and public authorities!
- Help solve your city climate challenge and become part of a global community working together to take climate action!
- Develop real climate solutions in partnership with local food producers

What is the Cork Climathon challenge?

How to make Cork's food and agriculture sustainable and climate smart

Where does it take place?

Environmental Research Institute, University College Cork, Lee Road, Cork

How do I get involved?

Submit your application on Cork's Climathon page:

www.climathon.climate-kic.org/cork

Places are limited so please give us as much information as possible on your skills!
